ANIKET KUSHWAHA

Full-Stack Engineer | Backend Systems, SaaS Infrastructure & LLM Integrations

kushwahaaniket141@gmail.com | +91 8104661596 | www.aniket.page | github.com/Aniketk8104 | linkedin.com/in/aniket-kushwaha-ak | Navi Mumbai, India

PROFILE

Full-Stack Engineer focused on backend systems and SaaS infrastructure. Primary engineer on **5 production platforms used by 5+ client businesses**: a WhatsApp Cloud API SaaS, a real-estate CRM, an HRMS with mobile apps, a teleradiology platform and a commerce platform. Strong in Node.js, TypeScript, PostgreSQL, MongoDB, Redis/BullMQ, React/Next.js, Docker, Oracle Cloud and AWS, with a focus on reliability: idempotent webhooks and payments, job queues, tenant isolation, safe deploys and guarded LLM features. **Immediate joiner.**

EXPERIENCE

Aura Tech Services

Jul 2025 – **Present**

Full-Stack Engineer | Navi Mumbai, India (Hybrid) · ***auratechservices.in***

- Own architecture, code, CI/CD and cloud operations for 5 production platforms (detailed under Projects), serving clients such as **Bhagwati Group** (real estate) and a **US-based teleradiology company**.
- Run production on **Oracle Cloud (ARM) and AWS** with Docker, Traefik, GitHub Actions and GHCR: health-gated **blue/green deploys**, image-tag rollback, nightly backup restore drills and GlitchTip error tracking.
- Built guarded LLM features across products: multi-provider routing with failover and cooldowns (Gemini, Groq, DeepSeek, OpenAI-compatible), response caching, time budgets and permission-scoped assistants.

The StopSearch Technologies

Apr 2025 – Jun 2025

Software Engineer Intern | Remote · ***stopsearch.co***

- Built APIs, role-specific dashboards, authentication and deployment workflows for a 3-role hiring marketplace (job seekers, hiring managers and recruitment consultants).

PROJECTS

Bvisionr — AI WhatsApp Cloud API SaaS

connect.bvisionr.com

Node.js 20 | Express 5 | PostgreSQL 16 | Redis | BullMQ | Socket.IO | React 19 | Docker | OCI

- Built a multi-tenant WhatsApp Cloud API SaaS for broadcast campaigns, a shared team inbox and AI replies; since May 2026 it has processed **62K+ webhook events, 36K+ chat messages and 33K+ LLM calls**.
- Engineered durable messaging: signed, replay-guarded webhooks, a **Postgres SKIP LOCKED job queue** that survives Redis failure, dead-letter replay and 1–500 msg/s throttling on campaigns up to **2,001 recipients**.
- Designed a **148-table PostgreSQL schema** (59 migrations) with RBAC/IAM, MFA-gated super-admin and an append-only billing ledger enforced by triggers, plus an LLM router with cooldowns, caching and failover.
- Added a Meta Ads copilot with lead attribution (**1,248 ad leads**), QR-linked WhatsApp workspaces (Baileys), contextual AI memory and a public REST API with outbound webhooks.

AuraStack — Multi-tenant CRM for Real-Estate Developers

crm.aurastack.in

Next.js 14 | TypeScript | MongoDB | Redis | BullMQ | SSE | Capacitor (Android, iOS) | Docker | OCI

- built an CRM as multi-tenant SaaS in 3 months (**356 commits**): **336 API handlers**, 48 models and 62 pages for unit inventory, leads, site visits, bookings and payment schedules, plus Android/iOS apps.
- Live for **Bhagwati Group**: **5,400+ leads, 47K+ lead activities, 2,389 site visits and 152 bookings** tracked by ~30 monthly active staff, with Meta Lead Ads flowing into round-robin lead pools.
- Closed cross-tenant leak paths (foreign-key tenant guard, **server-enforced role scopes** for 13 roles and 16 modules, next-request session revocation), plus an AI assistant limited to permitted actions.
- Built collections for developers: configurable payment plans, demand letters and receipts numbered per financial year, and a background worker that flags overdue installments.

Future & Fortune HRMS — Multi-tenant HRMS with Mobile Apps

hr.futureandfortune.in

Node.js | Express | TypeScript | MongoDB | Next.js 15 | React Native (Expo 54) | Docker | OCI

- Built a **database-per-tenant** HRMS: an Express/TypeScript API (33 modules, 7 roles, 38 permissions), a Next.js web app (65 pages) and an E xpo iOS/Android app and PWA (42 screens).
- Live at **Bhagwati Group** for **82 employees across 25 sites**: 1,900+ GPS + selfie check-ins, shift-only background tracking and monthly payroll for ~80 staff with TDS, Form 16, Form 24Q and bank-file exports.

- Added **fake-GPS trust scoring**, a shared phone/browser/server face check and per-employee rate limits; **1,309 Jest tests** gate CI/CD, now ~8 min (was ~24).
- Shipped leave, regularisation, recruitment and joining workflows with approval history (880 approval records and 36 candidates at Bhagwati Group).

Radioque — Multi-centre Teleradiology Platform

Next.js 16 | Node.js | TypeScript | MongoDB | Redis | Orthanc (DICOM) | Cornerstone3D | AWS EC2

- Built a teleradiology platform for a **US-based client**: imaging centres push DICOM studies to Orthanc (routed by AE title) and radiologists read and report in the browser; **6 centres onboarded** for testing.
- Cut cached DICOM frame loads from **~1.4 s to ~3 ms** with a CPU-bounded decode semaphore, request coalescing and a Redis frame cache shared by the 2D viewer and in-browser MPR (Web Workers).
- Designed governed reporting: a report **state machine**, TTL edit locks with heartbeats, optimistic versioning, 73 modality templates, live Socket.IO updates and centre-scoped audit logs; 170 Jest tests.

Aura Tech Services — Rental, Sales & Buyback Commerce Platform

auratechservices.in

React 18 | Node.js | Express | MongoDB | Razorpay | Docker | GitHub Actions | OCI | AWS S3

- Built the company's live platform for laptop rental, sales and buyback: **220+ REST endpoints**, 27 models and 45+ pages across customer, Admin, Dealer and Partner portals with RBAC and Google sign-in.
- Made payments race-safe: HMAC-verified Razorpay callbacks and webhooks in MongoDB transactions with **once-only inventory finalization**, plus GST invoice PDFs, email/WhatsApp alerts and dealer subscriptions.
- Built area-based order-to-dealer routing and a tested partner-quote state machine; migrated hosting from AWS EC2/PM2 to ARM64 Docker on Oracle Cloud with an S3/MinIO storage layer (AWS SDK v3).

Bhagwati Group — Real-Estate Website & Headless CMS (launching)

Next.js 16 | React 19 | TypeScript | Express | MongoDB | Redis | WebCodecs | Docker | Traefik

- Built the site, a 27-screen admin app and an Express/TypeScript CMS (22 models, RBAC, virus-scanned uploads, scheduled publishing); **70 deploys in 4 weeks** to a 1 vCPU / 4 GB VPS with memory budgets.
- Replaced a 518-image scroll sequence (**30.6 MB**) with one **13.3 MB AV1 stream** decoded frame-accurately via WebCodecs, at higher visual quality (VMAF 97.4 vs 96.4).

StopSearch — Full-Stack Live Hiring Platform

stopsearch.co

Next.js 14 | Express 5 | TypeScript | MongoDB | Redis | BullMQ | Socket.IO | Docker | OCI

- Built a 3-role hiring marketplace: **148 REST endpoints**, 36 models and 41 pages with swipe matching, rule-based ranked feeds, consultant commissions and event-driven feed projections with dead-letter replay.
- Delivered real-time chat and presence (Socket.IO, Redis adapter), Jitsi interview rooms with BullMQ reminders, and an AWS EC2/S3 to Oracle Cloud ARM + MinIO migration with multi-arch CI/CD (**80 deploys**).

TECHNICAL SKILLS

Languages:	**TypeScript** · **JavaScript** · SQL · Python · Bash
Backend:	**Node.js** · **Express.js** · REST APIs · WebSockets (Socket.IO) · BullMQ · Webhooks
Frontend:	**React.js** · **Next.js** · React Native (Expo) · Tailwind CSS · MERN Stack
Database:	**PostgreSQL** · **MongoDB** · **Redis** · Schema Design · Migrations · Query Optimisation
DevOps:	**Docker** · **GitHub Actions (CI/CD)** · Oracle Cloud (OCI) · AWS (EC2, S3) · Linux
AI / LLM:	LLM Integration · Gemini · Groq · DeepSeek · OpenAI-compatible APIs · Tool Calling
Integrations:	WhatsApp Cloud API · Meta Lead Ads · Razorpay · Orthanc / DICOM · Web Push / FCM
Concepts:	System Design · Multi-tenancy · Event-Driven Architecture · Idempotency · Caching
Security:	JWT · OAuth 2.0 · RBAC · Rate Limiting · HMAC Verification · CSRF Protection
Tools:	Git · Traefik · Nginx · MinIO · Postman · VS Code

EDUCATION

CKT ACS College, New Panvel

2023-2026

BSc. Computer Science · **CGPA: 9.79 / 10**

Awards:

- **First Rank – Third Year B.Sc. Computer Science (TYCS), CKT ACS College (2025–2026)**
- **First Prize — Rapid Application Development, E-Fest 2024**
- **First Prize — Kill the Bugs Debugging Contest, E-Fest 2025**
