aniketdev.tech | Navi Mumbai, India

PROFILE

Full-Stack Systems Engineer with experience building **production-grade SaaS platforms**, automation infrastructure, and scalable backend systems. Specialized in Node.js, React, MongoDB, AWS, distributed workflows, **WhatsApp Cloud API infrastructure**, **RBAC systems**, and cloud-native application architecture.

EDUCATION

CKT ACS College, New Panvel.
BSc. Computer Science
2026 | **CGPA: 9.79 / 10**

TECHNICAL SKILLS

PROGRAMMING

JavaScript • TypeScript • SQL

BACKEND

Node.js • Express.js • REST APIs • BullMQ
Socket.IO • JWT • OAuth 2.0 • RBAC

FRONTEND

React.js • Next.js

DATABASE & INFRASTRUCTURE

MongoDB • PostgreSQL • Docker • AWS
EC2 • OCI • CI/CD • GitHub Actions

INTEGRATIONS

WhatsApp Cloud API • Razorpay
Orthanc • Cloudinary

TOOLS

Git • Postman • VS Code • Linux

ACHIEVEMENTS

- First Prize — **Rapid Application Development** | E-Fest 2024
- First Prize — **Kill the Bugs** Debugging Contest | E-Fest 2025

EXPERIENCE

AURA TECH SERVICES | Full-Stack Engineer

Sep 2025– Present

- Architected and developed production-grade SaaS platforms, automation infrastructure, and **multi-dashboard** operational systems using Node.js, React, MongoDB, and AWS.
- Engineered scalable backend APIs, **RBAC systems**, **payment workflows**, queue-based processing, and cloud deployment pipelines for real business operations.
- Built high-performance platforms including **AI-powered WhatsApp infrastructure systems**, rental-commerce ecosystems, and workflow automation tools.

THE STOPSEARCH TECHNOLOGIES | Software Engineer Intern

Jun 2025 – Aug 2025

- Contributed to production **hiring platform** development by building scalable APIs, dashboard systems, authentication modules, and deployment workflows.
- Improved **backend performance**, operational workflows, and production feature reliability across the platform.

PROJECTS

BVISIONR — AI WHATSAPP INFRASTRUCTURE PLATFORM

React.js • Node.js • Express.js • MongoDB • Socket.IO • BullMQ • Meta Cloud API • OCI

- Architected AI-native WhatsApp infrastructure platform supporting real-time messaging, **multi-tenant** scaling, queue-based processing, and campaign orchestration for **production business workflows**.
- Engineered distributed messaging pipelines with BullMQ workers, webhook processing, retry systems, DLQ recovery, throughput control, and real-time delivery tracking supporting high-volume production communication workflows.
- Built advanced platform modules including AI-assisted campaign generation, no-code automation flows, RBAC-based team inbox, **analytics dashboards**, and operational **monitoring systems**.

RADIQUE — RADIOLOGY WORKFLOW SAAS

Next.js • Node.js • MongoDB • Orthanc • Docker

- Architected **healthcare workflow SaaS** platform with **PACS-style DICOM** handling, audit logging, workflow state management, and distributed diagnostic operations.
- Developed scalable backend systems supporting **multi-centre case allocation**, reporting workflows, and operational traceability.

AURA TECH SERVICES— LAPTOP RENTAL & COMMERCE PLATFORM

React.js • Node.js • MongoDB • AWS

- Developed production-grade rental, sales, and buyback commerce platform with **Admin, Dealer, and Partner dashboards**.
- Engineered RBAC-based operational workflows, scalable backend APIs, inventory systems, payment integration, and **cloud deployment architecture**.
